

Environmental Policy

Viva Manufacturing (Poland) being a subsidiary of the VIVA Group, has defined its Environmental Policy to be in line with the fundamental environmental values declared by the Group and its Customers.

Viva as the manufacturer of the media packaging is aware of its impact on the environment and wants to take necessary actions to minimize any negative environmental influences.

Viva, furthermore wants to support actively its Clients in their pro-environmental performance in order to protect the environment jointly against the effects of economic growth.

Therefore, Viva obligates to:

- follow the current normative requirements,*
- co-operate with the Clients in their environmental performance,*
- manufacture its products in a way that uses the resources, materials and electric energy wisely and economically,*
- supervise its suppliers so that they provide the materials according to the requirements regarding the heavy metals content,*
- minimize the amount of production waste by recycling in the production process.*

To accomplish this Policy it is essential to have the involvement of all employees on all positions in order to

- plan the production minimizing unnecessary production breaks and stops,*
- produce on the highest quality level in order to eliminate any errors leading to generating defective products,*
- monitor production process aiming at early error detection and elimination of their root causes,*
- motivate employees to build their environmental awareness.*

On behalf of Viva Management Board I declare herewith to provide the resources essential to the environmental targets contained in Policy accomplishment.

This Policy should be made available to all our employees, Clients, suppliers or interested parties by its publication in the electronic media.
